Datasets and APIs

VECTOR INSTITUTE | INSTITUT VECTEUR

Considerations

Curated Datasets/APIs

Used By	Dataset / Tool Name	Dataset / Tool Summary	License Details	Dataset / Tool Link	Comments	Assigned Cohort	Classification	Approximate Size	License Review (Reviewers Only)	Information for End Users (Reviewers Only)	Data / Tool Approval (Data Office / Scientific Computing Only)
Reference Implementations	Consumer Price Index	Consumer Price Index, by geography, monthly, percentage change, not seasonally adjusted, provinces	https://www.statcan.gc.ca/en/terms-conditions/open-licence	https://www150.statcan.gc.ca/t1/tbl1/en/tv.action?pid=1810000	Permissive open license.		Dataset	10s of MBs per batch	Statistics Canada Open Licence	Attribution is required	Approved
Reference Implementations	Bank of Canada, money market and other interest rates	Bank of Canada, money market and other interest rates	https://www.statcan.gc.ca/en/terms-conditions/open-licence	https://www150.statcan.gc.ca/t1/tbl1/en/tv.action?pid=1010001	Permissive open license.		Dataset	10s of MBs per batch	Statistics Canada Open Licence	Attribution is required	Approved
Reference Implementations	Gross domestic product (GDP)	Gross domestic product (GDP) at basic prices, by industry, monthly	https://www.statcan.gc.ca/en/terms-conditions/open-licence	https://www150.statcan.gc.ca/t1/tbl1/en/tv.action?pid=3610043	Permissive open license.		Dataset	10s of MBs per batch	Statistics Canada Open Licence	Attribution is required	Approved
Reference Implementations	FRED	Broad US and international economic data from Federal Reserve Bank of St. Louis.	https://fred.stlouisfed.org/docs/api/terms_of_use.html	https://fred.stlouisfed.org/docs/api/fred/	API key required for initial data access. Attribution requirement.		Dataset	10s of MBs per batch	API Terms of Use	disclaimer is required: "This product uses the FRED® API but is not endorsed or certified by the Federal Reserve Bank of St. Louis."	Approved
Reference Implementations	Consumer Price Index: Total, All Items for Canada	CPALCY01CAM661N - Consumer Price Index: Total, All Items for Canada	https://fred.stlouisfed.org/docs/api/terms_of_use.html	https://fred.stlouisfed.org/series/CPALCY01CAM661N	API key required for initial data access. Attribution requirement.		Dataset	10s of MBs per batch	API Terms of Use	disclaimer is required: "This product uses the FRED® API but is not endorsed or certified by the Federal Reserve Bank of St. Louis."	Approved
Reference Implementations	Consumer Price Index for All Urban Consumers: Meats, Poultry, Fish, and Eggs in U.S. City Average	CUSR0000SAF112 – Consumer Price Index for All Urban Consumers: Meats, Poultry, F	https://fred.stlouisfed.org/docs/api/terms_of_use.html	https://fred.stlouisfed.org/series/CUSR0000SAF112	API key required for initial data access. Attribution requirement.		Dataset	10s of MBs per batch	API Terms of Use	disclaimer is required: "This product uses the FRED® API but is not endorsed or certified by the Federal Reserve Bank of St. Louis."	Approved
Reference Implementations	Consumer Price Index for All	CUSR0000SAF113 – Consumer Price Index for All Urban Consumers: Fruits and Veget	https://fred.stlouisfed.org/docs/api/terms_of_use.html	https://fred.stlouisfed.org/series/CUSR0000SAF113	API key required for initial data access. Attribution requirement.		Dataset	10s of MBs per batch	API Terms of Use	disclaimer is required: "This product uses the FRED® API but is not endorsed or certified by the Federal Reserve Bank of St. Louis."	Approved
Reference Implementations	Consumer Price Index: OECD Groups: All Items Non-Food and Non-Energy for Canada	CPGRLE01CAM657N – Consumer Price Index: OECD Groups: All Items Non-Food and	https://fred.stlouisfed.org/docs/api/terms_of_use.html	https://fred.stlouisfed.org/series/CPGRLE01CAM657N	API key required for initial data access. Attribution requirement.		Dataset	10s of MBs per batch	API Terms of Use	disclaimer is required: "This product uses the FRED® API but is not endorsed or certified by the Federal Reserve Bank of St. Louis."	Approved
Reference Implementations	Canada / U.S. Foreign Exchange Rate	DEXCAUS – Canada / U.S. Foreign Exchange Rate	https://fred.stlouisfed.org/docs/api/terms_of_use.html	https://fred.stlouisfed.org/series/DEXCAUS	API key required for initial data access. Attribution requirement.		Dataset	10s of MBs per batch	API Terms of Use	disclaimer is required: "This product uses the FRED® API but is not endorsed or certified by the Federal Reserve Bank of St. Louis."	Approved
Reference Implementations	Long-Term Government Bond Yields: 10-year: Main (Including Benchmark) for Canada	IRLTLT01CAM156N – Long-Term Government Bond Yields: 10-year: Main (Including B	https://fred.stlouisfed.org/docs/api/terms_of_use.html	https://fred.stlouisfed.org/series/IRLTLT01CAM156N	API key required for initial data access. Attribution requirement.		Dataset	10s of MBs per batch	API Terms of Use	disclaimer is required: "This product uses the FRED® API but is not endorsed or certified by the Federal Reserve Bank of St. Louis."	Approved
Reference Implementations	Real Residential Property Prices for Canada	QCAR368BIS – Real Residential Property Prices for Canada	https://fred.stlouisfed.org/docs/api/terms_of_use.html	https://fred.stlouisfed.org/series/QCAR368BIS	API key required for initial data access. Attribution requirement.		Dataset	10s of MBs per batch	API Terms of Use	disclaimer is required: "This product uses the FRED® API but is not endorsed or certified by the Federal Reserve Bank of St. Louis."	Approved
Reference Implementations	Yahoo! Finance	Financial and market data from Yahoo! finance, e.g. stock prices and market indices.	https://legal.yahoo.com/us/en/yahoo/terms/product-atos/apiforydn/index.html	https://github.com/ranaroussi/yfinance	May be rate limited at will. Attribution requirement. Data commonly accessed via yfinance Python package.		Dataset	10s of MBs per batch	Apache 2.0	Copyright and Licence notice Must include notice of changes made, if modified Attribution Required	Approved
Reference Implementations	ForecastBench	Aggregation of multiple sources of prediction questions and resolutions including from FRED, Yahoo Finance, Metaculus, and Rand Forecasting.	https://github.com/forecastingresearch/forecastbench/blob/main/LICENSE	https://www.forecastbench.org/datasets/	No apparent access conditions beyond license.		Dataset	~ 1GB for full dataset; ~100MB for useful subset	CC BY SA 4.0	Copyright and License notice Same license State Changes Attribution is required	Approved
Reference Implementations	New York ISO	Energy market price and system load data from New York's independent system operator. Load data are available down to 5-minute windows across ~11 geographic regions.	https://www.nyiso.com/legal-notice	https://www.nyiso.com/load-data	Attribution required.		Dataset	100s of MBs	No License	Attribution is required	Approved
Reference Implementations	Google ADK Tools	Standard set of tools included with Google's Agent Development Kit, including Google Search and URL Context.	N/A	https://ai.google.dev/gemini-api/docs/tools	Tools may retrieve Gemini-filtered data from open internet. Not used to build full datasets but rather for agentic forecasters to retrieve supporting context before making predictions.		API	~KBs per tool call	content of website licensed under CC BY 4.0 code samples are licensed under the Apache 2.0 License	CC BY 4.0 - Attribution is required Apache 2.0 - Copyright and Licence notice, Must include notice of changes made, if modified & Attribution Required	Approved

- We've **prepared a repository of curated datasets and APIs**, selected based on what has worked best for past cohorts.
  - **By default, teams are expected to start with these datasets/APIs** for their proof of concept during the Bootcamp.
- If your team prefers to use a different dataset or API (including synthetic data), **please discuss this with your facilitators during the Learn Days**.
  - If a dataset or API cannot be hosted in Vector's environment, teams may still work in parallel in their own environment.
- Dataset/API request form is now available.

Requests will be reviewed **case-by-case**, and approval is subject to capacity and feasibility.

VECTOR INSTITUTE | INSTITUT VECTEUR

Considerations (Cont.)

Accessing and Preparing Datasets

Datasets are not preloaded in Coder. Teams will need to download and prepare their selected dataset. This applies to both curated and custom datasets. Scripts for loading curated datasets can be found under `./scripts`. For custom datasets, **teams are strongly advised to handle any required preprocessing themselves ahead of the build days.**

Additional tooling for datasets

Accessing & Preparing Data

- Run 00_environment_check.ipynb first — it verifies every capability below.
- Structured time series (curated) — Not preloaded as files; fetched by script and cached in data/. Run your implementation's corresponding scripts/fetch_*.py. Sources: **StatCan, FRED, yfinance**. FRED needs your own free key → create a file .env on the project root and add FRED_API_KEY.
- **Web search & fetch** — No download. Grounded Google Search + web fetch give agents live, dated, citable context. Keys are injected on Coder; confirm via the env check notebook.
- **Code-executing agents (E2B)** — The agent's sandbox is a fresh VM from the bootcamp template with an empty data/ and the fetch scripts baked in — your local ./data is not shipped there. Get data in by having the agent run a fetch script inside the sandbox, or (advanced) instantiate CodeInterpreter with local_files=[...]. Rebuild/extend the template (scripts/build_e2b_template.py) for large or custom files.
- Bring your own dataset — For ingress into Vector environment, requires Data Office approval. For best results, datasets should have a clear ground-truth target, and be recent, not historical.
